

Be-REACHable

Royal Haskoning

Royal Haskoning's advisory group Chemicals Management has developed the expertise and tools to serve the chemical industry in dealing with REACH-issues.

For more than a decade we have been training industry and government in all aspects of chemicals and their legislation. With our knowledge, we can help you make your key decisions in Chemicals Management to become Reach Ready.

REACH training for business managers

For business managers (e.g. Executive managers, marketing and sales, IT) who need a helicopter view and an introduction on REACH, Royal Haskoning has developed a One-day **Course** on REACH.

The course is based on the REACH legislation and related REACH Implementation Projects (**RIP's**). After the course you will be able to oversee the impact of REACH on your company and know why and when to do what. The REACH Course will be lectured in English.

In order to ensure personal attention and interaction we have limited the group to a maximum of 25 participants. A binder with useful documentation and a CD-ROM are included.

The costs for the entire One-day training course are € 1.000,-. These costs include coffee/tea, lunch, drink and extended training materials.

Royal Haskoning offers a 20% discount for multiple subscriptions of one company.

Prices are excluding VAT.

In company training

We also provide an in-company training at your premises or at other locations. In that case it is possible to set up a tailor made program:

- Extended with practical cases to apply the gained knowledge;
- IUCLID 5 training included;
- Classification and labeling of chemicals.

*For more information
about the course or
specific possibilities*
